

## **Appendix A:** Detailed information about compounds with best score

(In silico search of tubulin polymerization inhibitors, by *H. K. Sahakyan, G. G. Arakelov, K.*

*B. Nazaryan)*

Pubchem CID	Score	molWeight	mfScore	Natom	molArea	molLogP	HBA	HBD	drugLikeness
692750	-43.45	329	-35.72	43	361	2.61	7	1	-0.213

4419227	-39.52	482	-45.57	65	531	2.92	10	1	0.637
17585330	-38.95	452	-31.71	61	480	2.94	9	2	1.216
Colchicine	-38.49	399	-111.14	54	438	2.72	8	1	0.956

**Pubchem CID** – PubChem Compound Identifier

**Score** – ICM binding score

**molWeight** – Molecular weight

**mfScore** – Potential of mean force score

**Natom** – Number of atoms in ligand

**molArea** – Molecular Area

**molLogP** – Lipophilicity

**HBA** and **HBD** – H-bond acceptors and donors respectively

**drugLikeness** – Predicted drug likeness property
